MARKUP SAMPLES, OUTPUT EXAMPLES,
RALPH AMISSAH**

1. Markup and Output Examples

1.1 Markup examples

Current markup examples and document output samples are provided at

[<http://www.jus.uio.no/sisu/SiSU/2.html>](http://www.jus.uio.no/sisu/SiSU/2.html)

Some markup with syntax highlighting may be found under

[<http://www.jus.uio.no/sisu/sample/syntax>](http://www.jus.uio.no/sisu/sample/syntax) but is not as up to date.

For some documents hardly any markup at all is required at all, other than a header, and an indication that the levels to be taken into account by the program in generating its output are.

1.2 A few book (and other) examples

Aukio, by Leena Krohn¹

“The Wealth of Networks”, Yochai Benkler

“The Wealth of Networks”, Yochai Benkler

¹ Reproduced with the kind permission of author and artist Leena Krohn, <http://www.kaapeli.fi/krohn> “Aukio” is from the work “Sphinx or Robot” http://www.jus.uio.no/sisu/sphinx_or_robot.leena_krohn.1996 which is included as a book example in this section, together with another of the author’s works, “Tainaron” http://www.jus.uio.no/sisu/tainaron.leena_krohn.1998

The ascii text was taken from Project Gutenberg. The markup transforms required are trivial. Of interest, in this instance I am saved by having alternative syntaxes/(structural modes) for marking up endnotes... as it was possible to do a simple search and replace to make the Project Gutenberg ascii presentation suitable for SiSU, using the older end-note markup style. This example instructs the program to use regular expressions, in this example the words: none; none; BOOK|FIRST|SECOND; CHAPTER; occurring at

the beginning of a line, to identify what should be treated as different levels of heading in a document (and used to make the table of contents). Note that there was very little markup required after the document headers and Project Gutenberg legal notices. As I presume the legal notices are similar in Project Gutenberg documents, (and I could not bear to think of preparing the same legal notices twice), I moved those to the “skin” for the Project, and these are now represented in the markup by <:insert1> and <:insert2> and the legal notices are available for similar insertion into the next Project Gutenberg text prepared for **SiSU**, should there be one.

I did a stylesheet/skin for the Gutenberg Project, ... I may have to remove. The markup transforms required are trivial. Of interest, in this instance I am saved by having alternative syntaxes/(structural modes) for marking up endnotes... as it is possible to do a simple search and replace to make Project Gutenberg ascii presentations suitable for **SiSU** using the older endnote markup style. There is very little markup required after the document headers and Project Gutenberg legal notices. As I presume the legal notices are similar in Project Gutenberg documents, (and I could not bear to think of preparing the same legal notices twice), I moved those to the “skin” for the Project, and these are now represented in the markup by the <:insert1> and <:insert2> markers and the legal notices are available for similar insertion into the next Project Gutenberg text prepared for **SiSU**, should there be one.

²⁶ <http://www.jus.uio.no/sisu/autonomy_markup0/toc.html>
 alternative markup variations revolving around endnotes
 (i) as above, markup with embedded endnotes, and header list of words/phrases to emphasise
 <http://www.jus.uio.no/sisu/sample/syntax/autonomy_markup0.sst.html>
 <http://www.jus.uio.no/sisu/sample/markup/autonomy_markup0.sst>
 (ii) Again markup with embedded endnotes, but font faces changed within paragraphs rather than in header as in i
 <http://www.jus.uio.no/sisu/sample/syntax/autonomy_markup1.sst.html>
 <http://www.jus.uio.no/sisu/sample/markup/autonomy_markup1.sst>
 (iii) Markup with endnote placemarks within paragraphs, the endnotes following the paragraph that contains them
 <http://www.jus.uio.no/sisu/sample/syntax/autonomy_markup2.sst.html>
 <http://www.jus.uio.no/sisu/sample/markup/autonomy_markup2.sst>
 (iv) Another alternative is to place the marked up endnotes sequentially and at the end of the text. This also works. The paragraph variant iii is perhaps easier to visually check should there be missing endnotes; but this variant iv may better suit the conversion of alternatively pre-prepared documents.

concordance

dcc, document content certificate (digests)

markup source text

zipped markup source pod

or display the names of the documents matched along with the objects (paragraphs) that meet the search criteria.³¹

1.4 Lex Mercatoria as an example

There is quite a bit to peruse if you explore the site Lex Mercatoria:

<<http://www.lexmercatoria.org/>> ³²

or perhaps:

<<http://lexmercatoria.org/treaties.and.organisations/lm.chronological>> ³³

1.5 For good measure the markup for a document with lots of (simple) tables

SiSU is not optimised for table making, but does handle simple tables.

- [SiSU marked up file with tables](#) ³⁴

- [Output of table file example](#) ³⁵

1.3 SQL - PostgreSQL, SQLite

A Sample search form is available at <<http://search.sisudoc.org>>

A few canned searches, showing object numbers. Search for:

English documents matching Linux OR Debian

GPL OR Richard Stallman

invention OR innovation in English language

copyright in English language documents

Note that the searches done in this form are case sensitive.

Expand those same searches, showing the matching text in each document:

English documents matching Linux OR Debian

GPL OR Richard Stallman

invention OR innovation in English language

copyright in English language documents

Note you may set results either for documents matched and object number locations within each matched document meeting the search criteria;

1.6 And a link to the output of a reported case

451 <<http://www.jus.uio.no/lm/england.fothergill.v.monarch.airlines.hl.1980/toc.html>>

³¹ of this feature when demonstrated to an IBM software innovations evaluator in 2004 he said to paraphrase: this could be of interest to us. We have large document management systems, you can search hundreds of thousands of documents and we can tell you which documents meet your search criteria, but there is no way we can tell you without opening each document where within each your matches are found.
