SiSU
Markup [0.58]

Ralph Amissah

copy @ www.jus.uio.no/sisu/ [*]

Generated by SiSU [SiSU 0.59.0 of 2007w38/0] www.jus.uio.no/sisu

SiSU is software for document structuring, publishing and search (with object citation numbering), www.sisudoc.org

SiSU is released under GPL 3 or later, <http://www.fsf.org/licenses/gpl.html>.

Document information:

sourcefile sisu_markup.sst

Generated by SiSU www.jus.uio.no/sisu

version information: SiSU 0.59.0 of 2007w38/0

For alternative output formats of this document check:

<http://www.jus.uio.no/sisu/sisu_markup/sisu_manifest.html>

Contents

1 **SiSU - Markup [0.58], Ralph Amissah**

2 **SiSU Markup**

1. Introduction to SiSU Markup[1]

3

1.1 Summary

4

SiSU source documents are plaintext (UTF-8)[2] files

5

All paragraphs are separated by an empty line.

6

Markup is comprised of:

7

- at the top of a document, the document header made up of semantic meta-data about the document and if desired additional processing instructions (such an instruction to automatically number headings from a particular level down)

8

- followed by the prepared substantive text of which the most important single characteristic is the markup of different heading levels, which define the primary outline of the document structure. Markup of substantive text includes:

9

  - heading levels defines document structure

10

  - text basic attributes, italics, bold etc.

11

  - grouped text (objects), which are to be treated differently, such as code blocks or poems.

12

  - footnotes/endnotes

13

  - linked text and images

14

  - paragraph actions, such as indent, bulleted, numbered-lists, etc.

15

Some interactive help on markup is available, by typing sisu and selecting markup or sisu –help markup

16

---

[1] From sometime after SiSU 0.58 it should be possible to describe SiSU markup using SiSU, which though not an original design goal is useful.

[2] files should be prepared using UTF-8 character encoding

1.2 Markup Examples

1.2.1 Online

Online markup examples are available together with the respective outputs produced from <http://www.jus.uio.no/sisu/SiSU/2.html> or from <http://www.jus.uio.no/sisu/sisu_examples/>

There is of course this document, which provides a cursory overview of sisu markup and the respective output produced: <http://www.jus.uio.no/sisu/sisu_markup/>

Some example marked up files are available as html with syntax highlighting for viewing: <http://www.jus.uio.no/sisu/sample/syntax>

an alternative presentation of markup syntax: <http://www.jus.uio.no/sisu/sample/on_markup.txt>

1.2.2 Installed

With **SiSU** installed sample skins may be found in: /usr/share/doc/sisu/sisu_markup_samples/dfsg (or equivalent directory) and if sisu-markup-samples is installed also under: /usr/share/doc/sisu/sisu_markup_samples/non-free

2. Markup of Headers

Headers consist of semantic meta-data about a document, which can be used by any output module of the program; and may in addition include extra processing instructions.

Note: the first line of a document may include information on the markup version used in the form of a comment. Comments are a percentage mark at the start of a paragraph (and as the first character in a line of text) followed by a space and the comment:

    % this would be a comment

2.1 Sample Header

This current document has a header similar to this one (without the comments):

    % SiSU 0.57
    @title: SiSU
    @subtitle: Markup [0.58]
    @creator: Ralph Amissah
    @rights: Copyright (C) Ralph Amissah 2007, part of SiSU documentation, License GPL 3
    @type: information
    @subject: ebook, epublishing, electronic book, electronic publishing, electronic document, electronic citation, data structure, citation systems, search
    @date.created: 2002-08-28
    @date.issued: 2002-08-28
    @date.available: 2002-08-28
    @date.modified: 2007-09-16
    @date: 2007-09-16
    @level: new=C; break=1; num_top=1
    % comment: in this @level header num_top=1 starts automatic heading numbering at heading level 1 (numbering continues 3 levels down); the new and break instructions are used by the LaTeX/pdf and odf output to determine where to put page breaks (that are not used by html output or say sql database population).
    @skin: skin_sisu_manual
    % skins modify the appearance of a document and are placed in a sub-directory under ./_sisu/skin ˜ /.sisu/skin or /etc/sisu/skin. A skin may affect single documents that request them, all documents in a directory, or be site-wide. (A document is affected by a single skin)
    @bold: /Gnu|Debian|Ruby|SiSU/

2.2 Available Headers

32

Header tags appear at the beginning of a document and provide meta information on the document (such as the Dublin Core), or information as to how the document as a whole is to be processed. All header instructions take either the form @headername: or 0˜ headername. All Dublin Core meta tags are available

33

@indentifier: information or instructions

34

where the "identifier" is a tag recognised by the program, and the "information" or "instructions" belong to the tag/indentifier specified

35

Note: a header where used should only be used once; all headers apart from @title: are optional; the @structure: header is used to describe document structure, and can be useful to know.

36

This is a sample header

37

% SiSU 0.38 [declared file-type identifier with markup version]

38

@title: [title text] This is the title of the document and used as such, this header is the only one that is mandatory

39

@subtitle: The Subtitle if any

40

@creator: [or @author:] Name of Author

41

@subject: (whatever your subject)

42

@description:

43

@publisher:

@contributor: 45

@translator: [or @translated_by:] 46

@illustrator: [or @illustrated_by:] 47

@prepared_by: [or @digitized_by:] 48

@date: 2000-08-27 [also @date.created: @date.issued: 49
@date.available: @date.valid: @date.modified:]

@type: article 50

@format: 51

@identifier: 52

@source: 53

@language: [or @language.document:] [country code for language if 54
available, or language, English, en is the default setting] (en - English, fr - French, de - German, it - Italian, es - Spanish, pt - Portuguese, sv - Swedish, da - Danish, fi - Finnish, no - Norwegian, is - Icelandic, nl - Dutch, et - Estonian, hu - Hungarian, pl - Polish, ro - Romanian, ru - Russian, el - Greek, uk - Ukranian, tr - Turkish, sk - Slovak, sl - Slovenian, hr - Croatian, cs - Czech, bg - Bul garian) [however, encodings are not available for all of the languages listed.]

[@language.original: original language in which the work was published] 55

@papersize: (A4|US_letter|book_B5|book_A5|US_legal) 56

@relation: 57

@coverage: 58

@rights: Copyright (c) Name of Right Holder, all rights reserved, or as 59
granted: public domain, copyleft, creative commons variant, etc.

@owner: 60

@keywords: text document generation processing management latex [61] pdf structured xml citation [your keywords here, used for example by rss feeds, and in sql searches]

@abstract: [paper abstract, placed after table of contents] [62]

@comment: [...] [63]

@catalogue: loc=[Library of Congress classification]; dewey=[Dewey classification]; isbn=[ISBN]; pg=[Project Gutenberg text number] [64]

@classify_loc: [Library of Congress classification] [65]

@classify_dewey: [Dewey classification] [66]

@classify_isbn: [ISBN] [67]

@classify_pg: [Project Gutenberg text number] [68]

@prefix: [prefix is placed just after table of contents] [69]

@prefix_a: [prefix is placed just before table of contents - not implemented] [70]

@prefix_b: [71]

@rcs: $Id: sisu_markup.sst,v 1.2 2007/09/08 17:12:47 ralph Exp $ [used by rcs or cvs to embed version (revision control) information into document, rcs or cvs can usefully provide a history of updates to a document] [72]

@structure: PART; CHAPTER; SECTION; ARTICLE; none; none; [73] optional, document structure can be defined by words to match or regular expression (the regular expression is assumed to start at the beginning of a line of text i.e. $^{)}default markers :$ $A~to : C~and 1~to 6~can be used within text instead, without this header tag, and may be used to supplement the instructions provided in this header tag if provided (@structure : is$

@level: newpage=3; breakpage=4 [74] paragraph level, used by latex to breakpages, the page is optional eg. in newpage

@markup: information on the markup used, e.g. new=1,2,3; break=4; [75] num_top=4 [or newpage=1,2,3; breakpage=4; num_top=4] newpage and breakpage, heading level, used by LaTeX to breakpages. breakpage: starts on a new page in single column text and on a new column in double column text; newpage: starts on a new page for both single and double column texts.

num_top=4 [auto-number document, starting at level 4. the default is to provide 3 levels, as in 1 level 4, 1.1 level 5, 1.1.1 level 6, markup to be merged within level]

num_extract [take numbering of headings provided (manually in marked up source document), and use for numbering of segments. Available where a clear numbering structure is provided within document, without the repetition of a number in a header.] [In 0.38 notation, you would map to the equivalent levels, the examples provided would map to the following new=A,B,C; break=1; num_top=1 [or newpage=A,B,C; breakpage=1; num_top=1] see headings]

@bold: [regular expression of words/phrases to be made bold] [76]

@italics: [regular expression of words/phrases to italicise] [77]

@vocabulary: name of taxonomy/vocabulary/wordlist to use against [78] document

@skin: skin_doc_[name_of_desired_document_skin] [79] skins change default settings related to the appearance of documents generated, such as the urls of the home site, and the icon/logo for the document or site.

@links: { **SiSU** }http://www.jus.uio.no/sisu/; [80] { FSF }http://www.fsf.org

@promo: sisu, ruby, search_libre_docs, open_society [81] places content in right pane in html, makes use of list.yml and promo.yml, commented out sample in document sample: free_as_in_freedom.richard_stallman_crusade_for_free_software.sam_williams.sst

3. Markup of Substantive Text

3.1 Heading Levels

Heading levels are :A˜ ,:B˜ ,:C˜ ,1˜ ,2˜ ,3˜ ... :A - :C being part / section headings, followed by other heading levels, and 1 -6 being headings followed by substantive text or sub-headings. :A˜ usually the title :A˜ ? conditional level 1 heading (used where a stand-alone document may be imported into another)

:A˜ [heading text] Top level heading [this usually has similar content to the title @title:] NOTE: the heading levels described here are in 0.38 notation, see heading

:B˜ [heading text] Second level heading [this is a heading level divider]

:C˜ [heading text] Third level heading [this is a heading level divider]

1˜ [heading text] Top level heading preceding substantive text of document or sub-heading 2, the heading level that would normally be marked 1. or 2. or 3. etc. in a document, and the level on which sisu by default would break html output into named segments, names are provided automatically if none are given (a number), otherwise takes the form 1m̃y_filename_for_this_segment

2˜ [heading text] Second level heading preceding substantive text of document or sub-heading 3, the heading level that would normally be marked 1.1 or 1.2 or 1.3 or 2.1 etc. in a document.

3˜ [heading text] Third level heading preceding substantive text of document, that would normally be marked 1.1.1 or 1.1.2 or 1.2.1 or 2.1.1 etc. in a document

1˜ filename level 1 heading,

% the primary division such as Chapter that is followed by substantive text, and may be further subdivided (this is the level on which by default html segments are made)

3.2 Font Attributes

markup example:

normal text !{emphasis}! *{bold text}* _{underscore}_ /{italics}/ "{citation}" ⌈superscript⌉ {subscript}, +{insertedtext}+

normal text

!{emphasis}!

{bold text}

{underscore}

/{italics}/

"{citation}"

⌈superscript⌉

,{subscript},

+{inserted text}+

-{strikethrough}-

resulting output:

normal text **emphasis** **bold text** underscore *italics* ¡cite¿citation¡/cite¿ superscript subscript inserted text ~~strikethrough~~

normal text

emphasis

bold text

underscore

italics

¡cite¿citation¡/cite¿

superscript

subscript

inserted text

~~strikethrough~~

3.3 Indentation and bullets

markup example:

ordinary paragraph

_1 indent paragraph one step

_2 indent paragraph two steps

_9 indent paragraph nine steps

resulting output:

ordinary paragraph

    indent paragraph one step

        indent paragraph two steps

                indent   paragraph nine steps

markup example:

_* bullet text

_1* bullet text, first indent

_2* bullet text, two step indent

resulting output:

• bullet text

    • bullet text, first indent

        • bullet text, two step indent

Numbered List (not to be confused with headings/titles, (document structure))

markup example:

numbered list   numbered list 1., 2., 3, etc.

<=hash¿ numbered list numbered list indented a., b., c., d., etc.

3.4 Footnotes / Endnotes

Footnotes and endnotes not distinguished in markup. They are automatically numbered. Depending on the output file format (html, odf, pdf etc.), the document output selected will have either footnotes or endnotes.

markup example:

~{ a footnote or endnote }

resulting output:

3

markup example:

normal text~{ self contained endnote marker & endnote in one }~continues

resulting output:

normal text[4] continues

markup example:

normal text ~{* unnumbered asterisk footnote/endnote, insert multiple asterisks if required }~continues

normal text ~{** another unnumbered asterisk footnote/endnote }~continues

resulting output:

normal text [*] continues

normal text [**] continues

markup example:

normal text ~[* editors notes, numbered asterisk footnote/endnote series]~continues

normal text ~[+ editors notes, numbered asterisk footnote/endnote series]~continues

resulting output:

normal text [*1] continues

---

[3] a footnote or endnote

[4] self contained endnote marker and endnote in one

[*] unnumbered asterisk footnote/endnote, insert multiple asterisks if required

[**] another unnumbered asterisk footnote/endnote

normal text [+1] continues

Alternative endnote pair notation for footnotes/endnotes:

% note the endnote marker ”

the standard and pair notation cannot be mixed in the same document

3.5 Links

3.5.1 Naked URLs within text, dealing with urls

urls are found within text and marked up automatically. A url within text is automatically hyperlinked to itself and by default decorated with angled braces, unless they are contained within a code block (in which case they are passed as normal text), or escaped by a preceding underscore (in which case the decoration is omitted).

markup example:

normal text http://www.jus.uio.no/sisu continues

resulting output:

normal text <http://www.jus.uio.no/sisu> continues

An escaped url without decoration

markup example:

normal text http://www.jus.uio.no/sisu continues
deb http://www.jus.uio.no/sisu/archive unstable main non-free

resulting output:

normal text http://www.jus.uio.no/sisu continues

deb http://www.jus.uio.no/sisu/archive unstable main non-free

where a code block is used there is neither decoration nor hyperlinking,

---

[*1] editors notes, numbered asterisk footnote/endnote series

[+1] editors notes, numbered asterisk footnote/endnote series

code blocks are discussed later in this document

resulting output:

deb http://www.jus.uio.no/sisu/archive unstable main non-free

deb-src http://www.jus.uio.no/sisu/archive unstable main non-free

To link text or an image to a url the markup is as follows

markup example:

about { SiSU }http://url.org markup

3.5.2 Linking Text

resulting output:

about SiSU markup

A shortcut notation is available so the url link may also be provided automatically as a footnote

markup example:

about {

resulting output:

about SiSU [5] markup

3.5.3 Linking Images

markup example:

{tux.png 64x80 }image

% various url linked images

{tux.png 64x80 ”a better way” }http://www.jus.uio.no/sisu/

{GnuDebianLinuxRubyBetterWay.png 100x101 ”Way Better - with Gnu/Linux, Debian and Ruby” }http://www.jus.uio.no/sisu/

{

**resulting output:**

---

[5] <http://www.jus.uio.no/sisu/>

Gnu/Linux - a better way

[ruby_logo (png missing)] [6]

Way Better - with Gnu/Linux, Debian and Ruby

linked url footnote shortcut

{

text marker *ñame

note at a heading level the same is automatically achieved by providing names to headings 1, 2 and 3 i.e. 2˜[name] and 3˜[name] or in the case of auto-heading numbering, without further intervention.

3.6 Grouped Text

3.6.1 Tables

Tables may be prepared in two either of two forms

markup example:

table{ c3; 40; 30; 30;

This is a table

this would become column two of row one

column three of row one is here

And here begins another row

column two of row two

column three of row two, and so on

}table

resulting output:

This is a table	this would become column two of row one	column three of row one is here
And here begins another row	column two of row two	column three of row two, and so on

a second form may be easier to work with in cases where there is not much information in each column

markup example: [7]

!_ Table 3.1: Contributors to Wikipedia, January 2001 - June 2005

{table˜ h 24; 12; 12; 12; 12; 12; 12;}

|Jan. 2001|Jan. 2002|Jan. 2003|Jan. 2004|July 2004|June 2006

Contributors* | 10| 472| 2,188| 9,653| 25,011| 48,721

Active contributors** | 9| 212| 846| 3,228| 8,442| 16,945

Very active contributors*** | 0| 31| 190| 692| 1,639| 3,016

No. of English language articles| 25| 16,000| 101,000| 190,000| 320,000| 630,000

No. of articles, all languages | 25| 19,000| 138,000| 490,000| 862,000|1,600,000

Contributed at least ten times; * at least 5 times in last month; * more than 100 times in last month.

resulting output:

---

6 <http://www.ruby-lang.org/en/>

7 Table from the Wealth of Networks by Yochai Benkler
<http://www.jus.uio.no/sisu/the_wealth_of_networks.yochai_benkler>

Table 3.1: Contributors to Wikipedia, January 2001 - June 2005

	Jan. 2001	Jan. 2002	Jan. 2003	Jan. 2004	July 2004	June 2006
Contributors*	10	472	2,188	9,653	25,011	48,721
Active contributors**	9	212	846	3,228	8,442	16,945
Very active contributors***	0	31	190	692	1,639	3,016
No. of English language articles	25	16,000	101,000	190,000	320,000	630,000

* Contributed at least ten times; ** at least 5 times in last month; *** more than 100 times in last month.

3.6.2 Poem

basic markup:

```
poem{
  Your poem here
}poem
```
Each verse in a poem is given a separate object number.

markup example:

```
poem{

        'Fury said to a
        mouse, That he
        met in the
        house,
        "Let us
        both go to
        law:  I will
        prosecute
        YOU. –Come,
        I'll take no
        denial; We
        must have a
        trial:  For
        really this
        morning I've
        nothing
        to do."
        Said the
        mouse to the
        cur, "Such
        a trial,
        dear Sir,
        With
        no jury
        or judge,
        would be
        wasting
        our
        breath."
        "I'll be
        judge, I'll
        be jury,"
        Said
        cunning
        old Fury:
        "I'll
        try the
        whole
        cause,
        and
        condemn
        you
        to
        death."'
}poem
```

resulting output:

> 'Fury said to a
> mouse, That he
> met in the
> house,
> "Let us
> both go to

law: I will

prosecute

YOU. –Come,

I'll take no

denial; We

must have a

trial: For

really this

morning I've

nothing

to do."

Said the

mouse to the

cur, "Such

a trial,

dear Sir,

With

no jury

or judge,

would be

wasting

our

breath."

"I'll be

judge, I'll

be jury,"

Said

cunning

old Fury:

"I'll

try the

whole

cause,

and

condemn

you

to

death.'"

3.6.3 Group

basic markup:

```
group{
  Your grouped text here
}group
A group is treated as an object and given a single object number.
```

markup example:

```
group{
      'Fury said to a
      mouse, That he
    met in the
    house,
   "Let us
   both go to
   law: I will
    prosecute
      YOU. –Come,
    I'll take no
    denial; We
   must have a
  trial: For
```

really this

morning I've

nothing

to do."

Said the

mouse to the

cur, "Such

a trial,

dear Sir,

With

no jury

or judge,

would be

wasting

our

breath."

"I'll be

judge, I'll

be jury,"

Said

cunning

old Fury:

"I'll

try the

whole

cause,

and

condemn

you

to

death."'

}group

resulting output:

'Fury said to a

mouse, That he

met in the

house,

"Let us

both go to

law: I will

prosecute

YOU. –Come,

I'll take no

denial; We

must have a

trial: For

really this

morning I've

nothing

to do."

Said the

mouse to the

cur, "Such

a trial,

dear Sir,

With

no jury

or judge,

would be

wasting

our

breath."

"I'll be

judge, I'll

be jury,"

Said

cunning

old Fury:

"I'll

try the

whole

cause,

and

condemn

you

to

death."'

prosecute

YOU. –Come,

I'll take no

denial; We

must have a

trial: For

really this

morning I've

nothing

to do."

Said the

mouse to the

cur, "Such

a trial,

dear Sir,

With

no jury

or judge,

would be

wasting

our

breath."

"I'll be

judge, I'll

be jury,"

Said

cunning

old Fury:

"I'll

try the

whole

cause,

and

condemn

you

to

death."'

214   3.6.4 Code

215   Code tags are used to escape regular sisu markup, and have been used extensively within this document to provide examples of **SiSU** markup. You cannot however use code tags to escape code tags. They are however used in the same way as group or poem tags.

216   A code-block is treated as an object and given a single object number. [an option to number each line of code may be considered at some later time]

217   **use of code tags instead of poem compared, resulting output:**

218

'Fury said to a

mouse, That he

met in the

house,

"Let us

both go to

law: I will

219 4. Composite documents markup

220 It is possible to build a document by creating a master document that requires other documents. The documents required may be complete documents that could be generated independently, or they could be markup snippets, prepared so as to be easily available to be placed within another text. If the calling document is a master document (built from other documents), it should be named with the suffix **.ssm** Within this document you would provide information on the other documents that should be included within the text. These may be other documents that would be processed in a regular way, or markup bits prepared only for inclusion within a master document **.sst** regular markup file, or **.ssi** (insert/information) A secondary file of the composite document is built prior to processing with the same prefix and the suffix **._sst**

221 basic markup for importing a document into a master document

222
$<<$ |filename1.sst|@|^{j}
$<<$ |filename2.ssi|@|^{j}

223 The form described above should be relied on. Within the Vim editor it results in the text thus linked becoming hyperlinked to the document it is calling in which is convenient for editing. Alternative markup for importation of documents under consideration, and occasionally supported have

224 been.

r{filename}
{filename.ssi}require
$<<$ {filename.ssi}
% using textlink alternatives
|filename.ssi|@|^{j}*require*

MARKUP SYNTAX HISTORY

5. Notes related to Files-types and Markup Syntax

0.38 is substantially current, depreciated 0.16 supported, though file names were changed at 0.37

0.52 (2007w14/6) declared document type identifier at start of text/document:

SiSU 0.52

or, backward compatible using the comment marker:

% **SiSU** 0.38

variations include '**SiSU** (text|master|insert) [version]' and 'sisu-[version]'

0.51 (2007w13/6) skins changed (simplified), markup unchanged

0.42 (2006w27/4) * (asterisk) type endnotes, used e.g. in relation to author

0.38 (2006w15/7) introduced new/alternative notation for headers, e.g. @title: (instead of 0~ title), and accompanying document structure markup, :A,:B,:C,1,2,3 (maps to previous 1,2,3,4,5,6)

0.37 (2006w09/7) introduced new file naming convention, .sst (text), .ssm (master), .ssi (insert), markup syntax unchanged

0.35 (2005w52/3) sisupod, zipped content file introduced

0.23 (2005w36/2) utf-8 for markup file

0.22 (2005w35/3) image dimensions may be omitted if rmagick is available to be relied upon

0.20.4 (2005w33/4) header 0~ links

0.16 (2005w25/2) substantial changes introduced to make markup cleaner, header 0~ title type, and headings [1-6]~ introduced, also percentage sign (%) at start of a text line as comment marker
