SiSU - SKINS [0.58], RALPH AMISSAH

DOCUMENT SKINS - CONFIGURATION

1. Skins

Skins modify the default appearance of document output on a document, directory, or site wide basis. Skins are looked for in the following locations:

./_sisu/skin

~ /.sisu/skin

/etc/sisu/skin

Within the skin directory are the following the default sub-directories for document skins:

./skin/doc

./skin/dir

./skin/site

A skin is placed in the appropriate directory and the file named skin_[name].rb

The skin itself is a ruby file which modifies the default appearances set in the program.

1.1 Document Skin

Documents take on a document skin, if the header of the document specifies a skin to be used.

```
@skin: skin_united_nations
```

1.2 Directory Skin

A directory may be mapped on to a particular skin, so all documents within that directory take on a particular appearance. If a skin exists in

the skin/dir with the same name as the document directory, it will automatically be used for each of the documents in that directory, (except where a document specifies the use of another skin, in the skin/doc directory).

A personal habit is to place all skins within the doc directory, and symbolic links as needed from the site, or dir directories as required.

1.3 Site Skin

A site skin, modifies the program default skin.

1.4 Sample Skins

With SiSU installed sample skins may be found in:

`/etc/sisu/skin/doc` and `/usr/share/doc/sisu/sisu_markup_samples/dfsg/_sisu/skin/doc`

(or equivalent directory) and if sisu-markup-samples is installed also under:

`/usr/share/doc/sisu/sisu_markup_samples/non-free/_sisu/skin/doc`

Samples of `list.yml` and `promo.yml` (which are used to create the right column list) may be found in:

`/usr/share/doc/sisu/sisu_markup_samples/dfsg/_sisu/skin/yml` (or equivalent directory)
