SISU - SKINS, RALPH AMISSAH	1
DOCUMENT SKINS - CONFIGURATION	2

1. Skins

Skins modify the default appearance of document output on a document, directory, or site wide basis. Skins are looked for in the following locations:

`./_sisu/skin`

`~/.sisu/skin`

`/etc/sisu/skin`

Within the skin directory are the following the default sub-directories for document skins:

`./skin/doc`

`./skin/dir`

`./skin/site`

A skin is placed in the appropriate directory and the file named `skin_[name].rb`

The skin itself is a ruby file which modifies the default appearances set in the program.

1.1 Document Skin

Documents take on a document skin, if the header of the document specifies a skin to be used.

`@skin: skin_united_nations`

1.2 Directory Skin

A directory may be mapped on to a particular skin, so all documents within that directory take on a particular appearance. If a skin exists in the `skin/dir` with the same name as the document directory, it will automatically be used for each of the documents in that directory, (except where a document specifies the use of another skin, in the `skin/doc` directory).

A personal habit is to place all skins within the `doc` directory, and symbolic links as needed from the `site`, or `dir` directories as required.

1.3 Site Skin

A site skin, modifies the program default skin.

1.4 Sample Skins

With SiSU installed sample skins may be found in:

`/etc/sisu/skin/doc` and `/usr/share/doc/sisu/sisu_markup_samples/dfsg/_sisu/skin/doc`

(or equivalent directory) and if `sisu-markup-samples` is installed also under:

`/usr/share/doc/sisu/sisu_markup_samples/non-free/_sisu/skin/doc` 26

Samples of `list.yml` and `promo.yml` (which are used to create the right column list) may be found in: 27

`/usr/share/doc/sisu/sisu_markup_samples/dfsg/_sisu/skin/yml` (or equivalent directory) 28
